

Surface Encounters Macomb County Customer Service doesn't Stop at Installation

Surface Encounters ensures quality and customer satisfaction by making sure customers understand how to care for their new countertops to preserve the quality for years to come

Macomb, MI – Surface Encounters specializes in creating and installing natural stone countertops in kitchens and bathrooms to add beauty and quality to homes and businesses. Granite countertops are one of the highest-quality, durable surface materials that exist; however, if not properly cared for, they can be damaged.

For this reason, Surface Encounters continues their customer care even after installation is complete, by providing detailed care and cleaning instructions to maintain design quality. Here are some tips that Surface Encounters provides to their customers:

Use coaster under all glasses, especially those containing alcohol or citrus juices that contain acids that can etch or dull the surface of many stones. Use trivets or mats under hot dishes and use place mats under china, ceramics or silver objects that can scratch the surface.

Mop floors frequently, wipe spills immediately and clean surfaces with mild detergent or stone soap, rinse and dry thoroughly.

Avoid using vinegar, lemon juice or other cleaners containing acids on marble, limestone, travertine or onyx surfaces.

Do not use harsh bathroom cleaners, grot cleaners or tub & tile cleaners on your stone countertop. Avoid abrasive cleaners.

Use only cleaners that are designed for your countertop and follow instructions on the label.

Surface Encounters customer care and service continues long after fabrication and installation. Customers are encouraged to call Surface Encounters any time they have a question or concern about the care of their new countertop.
